

EDU-DEX in 100 words

Problem

EDU-DEX was created because training suppliers and their clients spent too much time and money on exchanging and converting training information, since no open data-standard was available.

Solution

Now, EDU-DEX *imports* updated training information every day, straight from suppliers' databases, including client-specific discounts.

Every day we *export* updated files to all customers. With their own selection of the supply.

Customers publish EDU-DEX information through their LMS, portal or App. Registrations will be processed through these systems without EDU-DEX involvement.

Non-profit foundation EDU-DEX

Suppliers pay a fixed annual fee, customers use EDU-DEX information free of charge.
